ABOUT PEDIATRIC DENTISTRY

Our multi-disciplinary oral care specialist team is dedicated to the delivery of specialized dental care for children with medical, physical and developmental disabilities. We offer dental care to both uninsured and under-insured children from birth to age 21, with the goal of increasing access to—and improving—oral health in the community.

Specialized patients are referred by their primary care physician or dentist to Carilion Clinic's dental care for oral evaluation and treatment.

This program is made possible by financial support from the Virginia Health Care Foundation, the Carilion Community Health Fund, the Maupin-Sizemore Foundation, Delta Dental of Virginia and numerous private donors.

If you are a medical professional, please visit our For Professionals section to find information about our clinical departments, academic activities and career opportunities. **Click here for professionals**

We are the most advanced in-hospital dental care in the Roanoke Valley.
